

SOFT & HARD SKILLS.

Soft skills defined.

“Soft skills” is a simple term for a complex system of traits and habits valued and sought by almost every employer. Some traits or habits come from your basic personality. Others can be learned or developed through practice. These skills are more difficult for an employer to teach and more difficult to evaluate. More people are terminated due to a lack of appropriate soft skills than for the lack of ability to do the job tasks (hard skills).

Employers often admit, “I can teach my employees how to do just about anything, but I can’t teach them to have a good attitude or common sense.” The problem with soft skills is that there is a basic assumption that they are inborn skills, but a closer examination of these skills would suggest otherwise. While some individuals exhibit these skills naturally, they can also be acquired and nurtured over time.

Having appropriate soft skills will help you outside of the work setting as well. Interpersonal skills, effective communication, good manners, a positive attitude and self-concept, being able to problem-solve, working as a team member, and being able to listen to and accept other’s ideas are traits of successful workers and managers.

SOFT SKILLS PREFERRED BY EMPLOYERS

GOOD WORK ETHICS

- Arrives on time

SOFT & HARD SKILLS.

Hard skills defined.

“Hard Skills” are specific, technical and teachable abilities that can be defined and measured. They are very tangible. By contrast, soft skills are less tangible and harder to quantify.

Examples of hard skills include job skills like typing, writing, math, reading and the ability to use software programs; soft skills are personality-driven skills like etiquette, getting along with other, listening and communicating well.

EXAMPLES OF HARD SKILLS

- AutoCAD certification
- Competent at Microsoft Excel
- Types 65 words per minute
- Can operate machinery
- Speaks and reads English competently
- Bilingual
- Has learned and applied customer service skills
